setaria_viridis	<i>Size measurements for Setaria viridis</i>
-----------------	--

Description

A dataset containing the length of each parts and other attributes for each branch of Setaria viridis. The variables are as follows:

Usage

`setaria_viridis`

Format

A data frame with 54 rows and 5 variables

root_number a factor denoting that it is growing from the same root

culm_length a number denoting culm length above ground (cm)

panicle_width a number denoting panicle width (cm)

panicle_length a number denoting panicle length (cm)

leaf_number an integer denoting number of leaves on the side branches (cm)
